The GAH Series extends the GA Series to high-system pressure applications for an ideal solution for a wide-range of low-flow applications.

The GAH Series is part of the patented suction shoe gear pump design offered exclusively by Micropump. The suction shoe technology offers best in class performance with industry-leading volumetric efficiency for fluid movement.

**HIGH-SYSTEM PRESSURE CAPABILITY**
Series GAH pumps are designed to withstand system pressures up to 345 bar (5000 psi).

**RELIABILITY**
GAH Series pumps self-compensate for wear, ensuring near zero slip and a longer pump life. The suction shoe technology delivers even longer reliability with higher differential pressures when compared to cavity style designs.

**WIDE TEMPERATURE RANGE**
Micropump’s GAH Series features the same hydraulic performance from the lowest temperature, even freezing, to the highest temperature allowed by the component materials.

**MAGNETIC DRIVE GEAR PUMP**
MAGNETIC GEAR PUMP FEATURES

SUCTION SHOE STYLE PUMPS
The suction shoe allows for consistent performance across a wide operating temperature range. The suction shoe pump, unlike any other gear pump on the market, self-adjusts on the job for reliable, pulseless flow, and features easier maintenance with less downtime than standard pumps.

SMOOTH PULSELESS DELIVERY
Positive displacement, precision gears provide consistent fluid delivery in continuous processes.

EASY TO SERVICE
Our pumps are easy to service using a Micropump® service kit and simple hand tools.

LEAK FREE DESIGN
The magnetic drive and static o-ring seal(s) keep the fluid securely inside the pump and potential contaminants out.

CHEMICALLY RESISTANT
Chemically inert materials for harsh environments.
