Micropump's GA Series are the smallest, most compact size and offers the lowest displacement of the suction shoe family of pumps.

The GA Series is part of the patented suction shoe gear pump design offered exclusively by Micropump. The suction shoe technology offers best in class performance with industry-leading volumetric efficiency for fluid movement.

MAGNETIC DRIVE GEAR PUMP

ELECTROMAGNETIC DRIVE FEATURES

EASY DESIGN INTEGRATION
Supports wide range of power supply voltages (10-38V). Error signals for easy error detection and diagnosis.

HIGH PERFORMANCE
Electromagnetic drive, with low inertia and high torque, for fast response times. Automotive grade electrical components for high temperature operation (up to 120°C) and durability.

LONG LIFE
Electromagnetic drive means fewer moving parts.

SMALL SIZE
The miniature package size of the GA Series is easily incorporated into the design of many systems.

RELIABILITY
GA Series pumps self-compensate for wear, ensuring near zero slip and a longer pump life. The suction shoe technology delivers even longer reliability with higher differential pressures when compared to cavity style designs.

WIDE TEMPERATURE RANGE
Micropump's GA Series features the same hydraulic performance from the lowest temperature, even freezing, to the highest temperature allowed by the component materials.
