

WHEN TO RECOMMEND A MICROPUMP MAG-DRIVE GEAR PUMP

PUMP ATTRIBUTE	DETAILS
▶ Leak Management	▶ Fluid leaks cannot be tolerated.
▶ Controlled Flow	▶ Controlled flow into constant or variable pressure is required.
▶ Continuous/Pulseless Flow	▶ Continuous flow with minimal pressure pulsation is needed.
▶ Consistent Operation	▶ Consistent, repeatable operation is required.
▶ Electrical Efficiency	▶ A small power budget is important.
▶ Volumetric Efficiency	▶ Minimal "slip" is important.
▶ Small Package	▶ Small package size is an advantage.
